On page 1, line 1 of the specification, added --now US Patent 6,676,589--, after "U.S. Patent Application No. 09/878,130 filed on June 8. 2001".

The following is an examiner's statement of reasons for allowance: the dunnage conversion machine and method comprised of a transfer region and opposed overlapping grippers which maintain a longitudinal gap to grip and pull the dunnage as the gripper overlap while being moved through the transfer region is distinguished over the prior art of Nilsson, which does not utilize a gap to grip the dunnage as the gripper move through the transfer region in an overlapping manner.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
